Skills

Frontend Developer with experience since 2022, specialized in Vue.js and JavaScript, focused on building scalable and maintainable user interfaces.

I have worked on REST API integrations and within agile environments, contributing to projects with real impact on users and business.

I am currently training as a Full Stack developer, aiming to gain a more comprehensive and product-oriented perspective.

-
- Frontend: Vue.js (v2, v3), JavaScript, HTML5, CSS3
 - Backend: Spring Boot, REST APIs (Junior)
 - Databases: PostgreSQL
 - DevOps & Tools: Git, Linux CLI, AWS EC2, Jira

-

Experience

Social Learning / Developer

December 2022 - Present

Development and optimization of functionalities using Vue.js (v2/v3), Spring Boot.

Participation in academic, financial and security aspects.

Social Learning / Team Leader

March 2024 - July 2025

I led the creation of a new project using Vue.js (v3), Spring Boot and PostgreSQL, with continuous deployment in the Linux environment on AWS.

I coordinated sprints on Jira, and I provided technical mentoring to the team, promoting good practices and collaborative work.

Social Learning / IT Support

December 2022 - December 2023

Incident management in hardware and software through a ticketing system, resolving issues with SQL aligned with business regulations.
